TF2

Pharmaworks has a wide range of state-of-the-art, standard blister machines and feeding technologies, along with an array of vision inspection options to meet the needs of all blister packaging applications.

Highly
Customized

TF3

The TF3 is a high output blister machine with speeds exceeding 400 blisters per minute, making it the perfect machine for high volume production and customizable applications. The TF3 accommodates all types of feeding systems and printers.

When unique product sizes, shapes, and fragilities require custom product delivery and handling methods for blister packaging, Pharmaworks is **the** expert. Pharmaworks has created multiple custom systems across multiple industries to gently control and handle a wide array of products.
